

AMENDMENTS TO THE DESCRIPTION

The description at page 17, line 10 and page 23, line 32 is being amended to identify the flexible member of the mouthpiece with reference signs 57 and 157, respectively.

The second paragraph on Page 17 is amended as follows:

In this embodiment the mouthpiece 31 includes a diaphragm 57 which is acted upon by the exhalation breath of the subject to actuate the trigger mechanism 55 on the generation of the predetermined actuation pressure. With this configuration, where the mouthpiece 31 is disposable, no part of the delivery device 11, other than the disposable mouthpiece 31, is exposed to the exhalation breath of the subject, and the delivery device 11 can be used to deliver substance to many subjects, such as in mass immunization or mass vaccination, without the risk of cross-contamination.

The sixth paragraph on Page 23 is amended as follows:

In this embodiment the mouthpiece 131 includes a diaphragm 157 which is acted upon by the exhalation breath of the subject to actuate the trigger mechanism 155 on the generation of the predetermined actuation pressure. With this configuration, where the mouthpiece 131 is disposable, no part of the delivery device 111, other than the disposable mouthpiece 131, is exposed to the exhalation breath of the subject, and the delivery device 111 can be used to deliver substance to many subjects, such as in mass immunization or mass vaccination, without the risk of cross-contamination.
